

LEED Platinum

Requires Behavioral Change ... Not Chasing More Points

Tuesday, January 10, 2012

Lunch Meeting, 11:30 AM – 1:00 PM

Heapy Engineering, 1400 W. Dorothy Lane, Dayton 45390

Presentation by Ryan Hoffman, CEM, BEAP, LEEP AP BD+C, O+M

Ryan Hoffman is the Manger of Heapy Engineering's *LEED & Energy Services Group*, where he has full responsibility for the technical aspects as well as the planning, scheduling and delivery of Heapy Engineering's LEED and Energy Services projects. His broad range of sustainability knowledge provides a strong foundation in an array of project types. Ryan has extensive experience in delivering energy efficient sustainable solutions for his clients. He is a frequent lecturer on LEED and Green Building Concepts and has educated over 500 people in the area of LEED and Sustainability through Heapy's LEED Training Seminars

Course Objectives: (CEU Approved)

- 1) Attendees will assess the people and cost saving benefits of pursuing LEED for Existing Buildings: Operations and Maintenance certification.
- 2) Attendees will review the advantages of using sustainable/green principles to guide building operations.
- 3) Participants will evaluate an actual LEED for Existing Buildings: O&M project and a recommended path toward achieving such certification for their own building(s).
- 4) Attendees will gain insight on the overall implementation and documentation process and the organization's internal behavioral change/transformation, from both the Owner's and LEED consultant's perspective.

Time: 11:30 AM Registration & Lunch
12:00 PM Program

Cost: CSI Dayton/Miami Valley Members – No Charge
Non-Members - \$25 (includes lunch)
